POSITIVE VOLITION

Genuine spiritual exercise does not involve the performing or observing supernatural events like miracles. The positive volition is not human good works, not a system of human good or human powers but a mental attitude that freed God to freely bless the mature believer in time.

Rational thinking is the essential human activity that distinguishes man from animals. Man was created with a soul capable of rational thought. For that reason, the mentality of the soul is the battlefield of the angelic conflict.

Man uses his free will to decide the state of his mentality. When the believer thinks evil, he is evil who resides in Satan's cosmic system and must use his positive volition to get out and go back to spirituality. Spiritual advancement is manifested basically by the believer's ability to rebound immediately after falling into sin and to continue moving toward his goal of spiritual maturity no matter how complicated his life maybe.

The free will decisions of the believer to rebound and his positive volition must take its form in aggressive action and persistent accumulation of Bible doctrine and the utilization of the divine resources or problem solving- devices. This steadiness of purpose is vital in reaching spiritual maturity. Positive volition is the only key that unlocks multiple blessings.

INEQUALITY & POSITIVE VOLITION

Man was never designed to be equal –we are born unequal and human free will assures further inequality. The more decisions people make the more unequal they become. Freedom and equality can never co-exist. God's protection of freedom guarantees that inequality will be a perpetual historical trend. Never in the history of mankind can equality be achieved. Equality in human history is impossible because of two reasons: First-because God has designated human volition to be the key issue in the angelic conflict. Second – because Satan, the god of this world gives preferential treatment to his servants, the unbelievers.

Both God's perfect justice and Satan's injustice assure human inequality in all dispensations. We are born unequal and the very fact God perpetuates our lives after birth means that we are also born with opportunities. Our great opportunity lies in the fact that we are possessors of eternal life and the perfect righteousness of God.

Each individual is given the chance to succeed or fail, but even in success or failure – inequality truly exists. No two people succeed to the same degree and no two people equally fail in the same degree.

Inequality is not detrimental in itself. Inequality is distorted into a problem by the arrogance of resenting inequality, by self pity or refusal to face reality and our very own inability to explore the opportunities of one's own capacity in a particular realm. No two persons are alike and the same.

Man is designed and designated to shape by his own volition. The proper use and application of human volition makes freedom and genuine happiness a reality. The careless and unwise use of volition enslaves a person to details of life.

Despite any limitations in circumstances, talent, mentality, health, appearance or any other outward factors and because man has soul- therefore, the realization of his life's potentialities comes from human free will or volition not from fate or luck.
