

UFO: DECEPTIVE INVASION

UFO is the acronym for unidentified flying object which also refers to space visitors, alien beings, extraterrestrials or extraterrestrial beings that wander in the vicinity of the planet earth. The most prominent universities around the world are now developing the technology and science that facilitate the documentation and recording of data on extraterrestrial encounters. UFO organizations that aim to record all UFO sightings and everything related to aliens flourish in America and other developed countries.

The controversial extraterrestrial phenomenon has been generating a lot of curiosity and interest in the most advanced countries. These UFO organizations are providing good publication materials that attract media, scientific, paranormal researches and even congressional investigations. They employ the most sophisticated tools of modern science to untangle the mystery of UFOs through unmanned and remote sensing technology, and through archaeological forensic science.

Scientists came out with extraterrestrial hypothesis which states that UFOs are spacecrafts sent to our planet from other inhabited worlds from other galaxies. These UFO fanatics fantasized that superior non-human beings live in other planets and by using superior machines to cross billion of miles in the infinite space to visit our planet. For the UFO devotees, fanatics and amateur observers, what seems impossible is reality, so they can talk about UFOs with excitement and unexplained delight. Those who support and advocate the UFO things are all around us. The aliens have finally invaded the minds of the human beings and they will do every thing to take control.

These people use the internet, the print and broadcast media to arouse the public interest on the subject of UFOs. They achieved the capacity to turn the UFOs collection of lore, myth and legend into something realistic in the minds of the ignorant. Anything that is based on hypothesis and theories is not a science but folklore.

UFO fanatics claimed that aliens have supernatural power to walk-in and possess the bodies of both humans and animals. They claimed that these aliens from far away galaxies are enormously advanced in technology and spiritually, and thereby capable of cloning the human genes and that of animals.

Hollywood and television have pervasive influence on conditioning the minds of the people. Our generation found it more difficult to accept and believe the biblical things because of its orthodoxy and primitiveness. People can easily accept and believe the fictional legends of UFOs because of their super-natural power and superior technology. People are hooked to the UFO phenomenon because of several fictional factors:

- Advance technology
- Supernatural power
- Superior intelligence
- Spiritual abilities
- Superior origin

Here are some basic arguments related to UFOs: Who created the aliens? From biblical position, all life on the planet earth was created by the Sovereign God. The Earth is just a small part of the universe where life exists. Ongoing scientific studies and researches are being conducted in some countries to advance the theory that life exist in some faraway planets. The Bible cannot support the thesis that UFOs were created by the same God who created human beings.

The claim of the UFOs advocates that aliens are authentic is an attempt to promote the thinking that the divine act of creating human life has been duplicated, (if not by God, who then created the UFOs, if they really do exist?). God created men to act as witness in the angelic conflict and to glorify God when they reach spiritual maturity. If God created the aliens, what would be His reason?

How come aliens can travel a massive distance by such a small vehicle? Small spacecraft cannot cross interspaces without great amount of fuel. Why aliens are domineeringly superior in intelligence but inferior in physical features (as claimed by those who saw it and as pictured by the film makers).

The study of the UFOs is not a science since no matter how sophisticated and modernized their technology everything about them are legendary, hoax and fictional. UFO revolves around theories and hypothesis that are yet to be proven. Science stands on the veracity of facts, data, and proven theories. Like evolution, the extraterrestrial things stand on the shallow ground of sincere but unrealistic hypothesis.

The motivations behind the UFO things are:

- Material wealth and prosperity for the film makers and writers
- Honor, fame and self-glory for the serious UFO fanatics
- Success in deceiving and misleading the ignorant people for Satan. The devil can turn anything as a destructive weapon against human beings, including the fictional extraterrestrials.

UFO fanatics are serious and sincere UFO fanatics who have devoted their time and money in documenting and recording everything about extraterrestrials. UFO fanatics claimed that hundreds of people have reported sightings of UFOs in various instances. They are trying to strengthen the theory that UFOs are real. Much of the fabricated proofs are intelligent plays against the mind of the people. Using the notion 'to see is to believe' then the UFO fanatics have so much to convince the unsuspecting.

Their reported sightings fall under several categories:

- Sighting of flying saucers
- Sighting of vague objects
- Sighting of parked flying saucers
- Sighting of human-like creatures
- Sighting of strange looking aliens
- Sighting of objects with translucent light

As the Rapture of the Church and the Tribulation is drawing near, it is part of history for deceptive phenomenon to spread like wild fire. The curiosity of many, including some born again Christians has openly distracted them from the doctrinal truth of the Bible. The day to day infiltration of deception into the souls of the ignorant is alarming and very distractive. Satan is using lies as diversionary tactic to distract and divert the attention of the Christians from Bible doctrine.

The curious have always been attracted to search for the unknown and the mystical relying on myths and legends of the so-called UFO experts. The attraction to search for the unknown can lead to distraction consequences as derivative of involvement into the cults, and the occults. Instead of spending time trying to know the secret of the UFOs believers must devote their time for the systematic and progressive study of Bible doctrine to nourish the souls. People who are crazy about UFOs are wasting their time and energy for something that has no value.

There are some conventional explanations for most of the so-called sightings of UFOs like meteorological phenomena or atmospheric mirages, or light effects, light mirages, optical mirages, some objects mistaken for unidentified flying objects.

UFO sightings could be the products of the mind due to the stress of modern life. When people are under the ever increasing anxieties, it is common to have illusions or delusions, substituting fantasy to supply what reality has denied. People who are weak emotionally are looking for their personal superheroes and extraterrestrial beings become fashionable ideas. UFO fanatics are sincere people who are deceived to believe the theoretical as reality.

Satan is using the hypothetic, the unknown, the mystical, and the occult to deceive human beings from the real issues of life. He is successful in diverting the focus of the believers away from God by employing the nonessentials like UFOs.

Satan is able to distract men from thinking about the destiny of their souls by making them occupied with the unnecessary things which men can live without. The purpose of the extraterrestrials is to generate mental and spiritual instability among the hearts of men.

Salvation is the complete work of Christ on the cross and provided free by His grace to whosoever might believe and accept Christ as the only Savior. Salvation is the free gift of God received from His grace through simple faith in Christ. Christians are the real aliens in this planet (Phil. 3:20) being the citizens of heaven.

There are two very important issues for all believers:

- What are you going to do with the Bible doctrine?
- How are you going to live the spiritual life while on the planet earth?
