VOLITION AND THE HERITAGE OF FREEDOM

Freedom is the most valuable possession of human beings. Human freedom is the heritage of human birth –the extension of the volition of the soul as the UNCAUSED CAUSE of man's thought and action. Freedom is self-determination, the function of the free will, never forced by threat, violence, not determined by environment, society or genetics manipulation.

In the sphere of freedom, the Lord Jesus Christ freed us to receive salvation and to advance in the divine sphere [Galatians 3:13, 5:1]. Freedom is the hope of the new birth (regeneration), which provides access to the believer to the love complex –the realm of spiritual freedom [2 Corinthians 3:17]. Bible doctrine is called the LAW OF FREEDOM, which defines the believer's freedom to glorify God [James 1:25, 2:12].

Positive volition toward the Word of God is the basis of spiritual freedom [psalm 119:45]. No one can prevent you from freedom to think of Bible doctrines; no one can stop you from your daily intake of Bible doctrines except yourself.

No extenuation (partial justification or excuses) can relieve you of your personal responsibility to redeem the time inside the divine sphere. Freedom as our human heritage and spiritual heritage also has become our very own national heritage. The existence and perpetuation of national liberty demands respects for legitimately established authority that depends on the cumulative personal integrity of all citizens. The only factor that limits the life of every individual is his volition. The only factor that limits the spiritual status of the believer is his volition. The justice of God releases blessings upon the believer depending on his adjustment to the justice of God.

No adjustments means no spiritual blessings. There are three spiritual adjustments to the justice of God – all of which requires positive volition toward God and toward His Word. Salvation is the non-meritorious decision of the soul outside the divine sphere, outside the plan of God. Salvation is one time decision-valid once and for all. It is one time response to the grace of God.

Rebound is the non-meritorious decision to re-enter the divine sphere from state of carnality. Rebound is the adjustment to the justice of God that restores, cleanses, forgives, and positions the believer for blessing based on the work of Christ.

Spiritual maturity requires a series of positive volition decisions from position of strength that opens more doors of opportunities in the future. Spiritual mature believers make a wise decision that creates options for greater decisions resulting to more blessings from the justice of God. Carnal and immature believers make wrong decisions that close future options for greater decisions.

We all enter the Christian life with some handicap from our lives as unbelievers and from exposure to satanic doctrines. Every handicap and difficulty is nullified by God's system of grace. Only your own negative volition prevents you from living the normal Christian way of life and advance toward spiritual maturity.

There is only one issue: How will your volition function, negatively or positively? Volition can be used to succeed or fail in the Christian life –but the grace of God provides only for success! Two strongholds hinder the proper function of volition: the arrogance and hatred complexes. Both paralyze the soul, distort the Word and follow the path of Satan.
